

Wingrove Primary School

December, 2017

Dear Parents and Carers,

We recently bought into a new maths website called 'MyMaths' which enables children to practise their maths skills at home through use of online lessons. The children can access the lessons with the following username and password:

Username: **wingrove**
Password: **square16**

The children need their individual username and password to access homework set by the class teacher. They access homework through the **Myportal** tab.

MyMaths requires 'Flash Player' to work. If your child has been trying to access the website on iPads and tablets, they may have experienced difficulties. Please try the following.

1. Go to the App store and search for "Puffin Academy". Puffin Academy is a free, mobile and tablet, Flash browser. It is only for educational websites and fully supports Flash content.
2. Download the Puffin Academy App – it is free.
3. Once downloaded, open the App and search for 'MyMaths' in the search bar (this is located at the top right hand side of the screen).

Once installed, your child will be able to access the website.

As a parent, you can work alongside your child when they log in to MyMaths at home. You will be able to support your child's learning by seeing what they are working on and checking their progress.

Encourage your child to practise their maths as much as possible. It has some brilliant activities to develop mathematical understanding and help children achieve their year group objectives.

Mrs. Large
Maths Coordinator
